

## Title Suppressions

Metrics for the titles listed below are not published in the 2011 JCR. Suppressed titles were found to have anomalous citation patterns resulting in a significant distortion of the Journal Impact Factor, so that the rank does not accurately reflect the journal's citation performance in the literature. The Journal Impact Factor provides an important and objective measure of a journal's contribution to scholarly communication, and its distortion by an excessive concentration of citations is a serious matter. JCR staff will monitor these journals going forward and the titles will be included in a future edition of JCR when the problem of citation concentration has been resolved. In the meantime, coverage of these journals in Web of Science and other Thomson Reuters products is not changed.
