Activities

- Romy sent emails directly to the Serbian corresponding authors with the information about APC discounts and the list of publishers and applicable journals based on their country specific title lists
- We sent emails to the Universities and Faculties librarians to share the information with their users/professors

Future plans and challenges

- We planned to negotiate Read and Publish agreements with other publishers (Springer, IoP, Emerald etc.)
- Due to COVID we had a contract and payment delay for this year (we still have two tender procedure in progress)
- Don't have enough time for R&P negotiations for the next year - small team and no time to prepare good statistics, evaluations, and negotiation strategy
- What is for sure, we will insist on renewals with no price increase with all publishers we collaborate with and see what will happen

Thank you!
